

■ Guiding principles of WIFO

Founded in 1927 by Friedrich August von Hayek and Ludwig von Mises, WIFO analyses economic developments in Austria and at the international level. The focus is on bridging academic research and economic policy on the basis of high quality empirical studies. These research results form the basis for economic and business decisions and an evidence-based economic policy discussion.

Scientific approach

The standard of the services offered by WIFO is underpinned by theory-based research using state-of-the-art empirical methods, up to date statistical data as well as knowledge of institutional and political settings.

International perspective

International framework conditions and experiences are considered in all studies in order to develop consistent economic policy recommendations. WIFO carries out research on behalf of national institutions as well as of the OECD, the EU and other international organisations.

Independence

WIFO commits itself to a politically independent position which is guaranteed by its broad scale of stakeholders and financiers overspanning various political interests. According to its charter, WIFO fulfills a public service as a non-profit organisation.

■ Research groups of the Austrian Institute of Economic Research

WIFO is Austria's leading institution in the field of empirical economic analysis and supports strategic economic and policy decisions. With a staff of about 100 persons, activities are grouped into five research groups. Within each of these, the major emphasis is given to the following topics:

Macroeconomics and European Economic Policy

- Business cycles, growth, macro economic forecasts and prices
- Public sector
- Interaction between financial and real economy

Labour Market, Income and Social Security

- Labour market, labour market policy and unemployment
- Income policy and income distribution
- Social insurance systems

Industrial Economics, Innovation and International Competition

- Industrial economics, entrepreneurial dynamism and corporate finance
- Innovation, productivity and technological change
- Internationalisation and international competition

Structural Change and Regional Development

- Geographical impact of economic policy measures
- Integration of regions with different development levels
- Structures and determinants of growth in cities, regions and sectors

Environment, Agriculture and Energy

- Climate, energy and farming policies in Austria and the EU
- Environmental technologies and ecological innovation
- Sustainable consumption, sustainable production and measures of welfare

International Board

The objective of WIFO's International Board is to provide advice regarding strategic matters and scholarly discussions to WIFO and its management team from an outside point of view as well as to support WIFO in developing international cooperations.

The members of the International Board are economists and other social scientists whose expertise includes empirical research on subjects relevant to economic policy.

Their function includes attending the annual International Board meeting in Vienna to discuss ongoing research, timely issues and strategic matters.

■ Services offered by WIFO

Scientific analysis and policy advice

WIFO elaborates economic analysis and macro-economic forecasts. It applies regularly for research programmes tendered by national and international research foundations.

Publications

- WIFO-Monatsberichte
